

Are you looking for a sugar replacer with **NO** aftertaste?

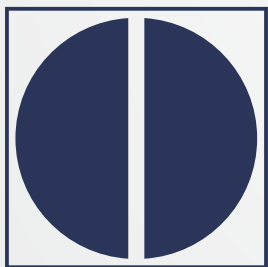

What our clients say about EZE Sweet

Leonore Botes "baie van my close vriende asook my hele familie weet ek sukkel geweldig met IBS... ekt omtrent a week trug besluit genoeg is nou genoeg en eze sweet gaan koop.. ek was verras oor hoe goedkoop di produk was en het sommer di 100 x 2g sakkies plus a 1kg eze sweet poeier gevat... dink dit was iets soos R50 en R75 saam?"

Vandat ek al my suiker uitgesny het en eze sweet begin drink het, het ek nog GLADNI weer maagkrampe gehad agv suiker ni... ekt ook nou heeltemal oorgegaan na gluten free produkte maar di suiker weet ek het grooot konsternasie altyd veroorsaak soos bv erge buikpyn dat ek medikasie moes drink en dan gaan le het... nou is dit verby.. for ever..dis aspartame, phenylanine en cane sugar FREE..dki Jesus vi di produk...ek sal dit vi almal aanbeveel en da is glo hot chocolate ook.. gaan dit volgende probeer..." - **via Facebook**

"I was introduced to Eze-sweet Sweetner by getting a 1kg packet as a gift and wow, i liked the product straight away, it's got no after taste and it is really wonderful for baking...so diabetics this product is the answer you've all been looking for...get a packet today and you will never again from it will stray! Thanks for this wonderful sweetner!"
Ernie Wilson

"I bought "EZE-Sweet" for the first time a week ago, and can confirm that it is the best sweetener I have ever used. I am a diabetic and my blood-sugar is stable using "EZE-Sweet", the product is sweeter than other branded sweeteners and it DEFINITELY has no aftertaste, which is a big plus for me. I will only buy "EZE-Sweet" from now on."
Louise Meistre

Sugars	1.1g	0.022g
Glycaemic Carbohydrates	1.6g	0.032g

2g of EZE Sweet = 2 teaspoons of sugar

Explanation of EZE Sweet Ingredients

What is saccharin?

Saccharin was discovered in the late 1800's and has been used safely by people ever since. It is between 300 and 500 times sweeter than sugar. Please visit www.saccharin.org for more information.

What is cyclamate?

Cyclamate was discovered in 1937 and has been used safely by people ever since. It is 30 - 50 times sweeter than sugar.

What is dextrose?

Dextrose is a natural carbohydrate derived from corn. Many sugar substitutes in powdered form contain dextrose. Dextrose (or another carrier) is used to dilute the very potent sweeteners to make it measurable for consumers.

Is EZE-Sweet safe to use for people, on diets & with diabetes?

It can easily be incorporated into the diets of people.

It may also be used in conjunction with food programs for people with diabetes, as well as with guidelines, for people with diabetes, who use carbohydrate counting. People with diabetes are advised to check with their registered dietician or physician.
